The Artemis Advantage for FedRAMP 20x

	Traditional/Manual	Template/Parameter	Artemis for FedRAMP 20x
Data Collection Method	Manual interviews <i>Weeks of back-and-forth</i>	Web questionnaires <i>Dropdown questions</i>	Direct API ingestion 1 hour via GRC tools
Documentation Approach	Handwritten <i>Generic templates</i>	Cookie-cutter <i>Force-fit your system</i>	AI-native Digital Twin YOUR actual implementation
Staffing Burden	3+ FTEs <i>Dedicated compliance team</i>	2–3 FTEs <i>Still labor intensive</i>	10% of traditional AI handles the heavy lifting
Time to Authorization	12–18 months <i>Manual everything</i>	6–12 months <i>Extensive customization</i>	8–10 weeks OSCAL-native automation
Total Cost	\$500K–\$1M+ <i>Consulting heavy</i>	\$200K–\$500K <i>Template + consulting</i>	90% less cost AI-native automation
Expert Guidance	External consultants	Limited support	Built-in expertise PMO & agency meetings

What's Included vs. What You Still Need

<p> Artemis Provides</p> <ul style="list-style-type: none"> OSCAL-native SSP auto-generation (machine-readable) Prioritized remediation with KSI-specific guidance Evidence mapping and automated collection Significant change request documentation Gap analysis against all 51 Key Security Indicators Action items exportable to your IT ticketing system Continuous compliance monitoring & quarterly reporting On-demand regeneration as environment evolves 	<p> You Still Need</p> <ul style="list-style-type: none"> Automated validation tooling: For PMO digital review process Security tooling for remediation: \$50K–\$150K (streamlined for 20x) Agency sponsor: Required for authorization Staff time for KSI remediation: 1–3 weeks to close identified gaps Human review: All Artemis outputs require final human review Post-ATO quarterly assessment: Continuous + quarterly reporting
--	--

 **FedRAMP 20x is the future of federal authorization — and SunStone brought the first CSP through it.** With 51 KSIs instead of 323 controls and an OSCAL-first approach, Artemis gets you authorized in weeks, not months — putting you ahead of competitors still stuck on Rev 5.

FedRAMP 20x Authorization Flow

Total Target: 28 Days to Submission Ready + 2-4 Weeks to Authorization

1	 Artemis Integration & KSI Gap Analysis <i>Platform Connection & System Ingestion</i>	Days 1-5
